

There is no reason to make filling out this report this complicated. I have spent over a week getting the email returned. I have applied twice. Now when I get to it, I have no earthly idea what a docket is and don't care. That's not what I am interested in. By the grace of God and about 45 minutes later I have finally figured out what a docket number is.

I am a land owner on Claytor Lake and would like for AEP to continue to lower the lake each Fall. It gives land owners a chance to repair shore line problems, be it riprap, bulkheads , or what ever. The water quality will suffer greatly if this draw down practice is eliminated. Errosion and sediment from boats is a big problem on the shore line. I think the erosion problem will be a lot bigger than the lose of mussels. I have never noticed mussels when the lake is lowered at our property.

Thank you,
Chuck
